

Control 26DT Compatibility with Atlas Sound Backcans & Grilles

Updated 050912 -- RK

JBL Control 26-DT is a premium loudspeaker driver designed for applications requiring the finest sound quality. Mounting points are on a 7.625 inch (196 mm) diameter mounting circle, as is standard for most 8-inch drivers. The weight is 4.2 lbs (1.9 kg) and the depth is 4.75" (120 mm). The backcan/grille assembly must be capable of reliably supporting this weight and accommodating this depth.

Avoid Torsion Systems -- Most torsion-type grille/backcan systems are not capable of supporting the 4.2 lb weight of this driver. The weight could pull down on the torsion springs, preventing a good seal to the ceiling and/or causing rattling.

COMPATIBLE ATLAS BACKCANS & GRILLES

95-8-7 or 95-8-10 Backcans

- 95-8 backcans to **NOT** use:
 - In the 95-8 family, do **NOT** use 95-8NS or 95-NK backcans, which are shallow depth.
 - Do **NOT** use T95-8 backcans, which are torsion type (see reasons, above).
- Compatible Grilles:
 - 51-8
 - 60-8(W)
 - 61-8W
 - 62-8
 - 63-8

BMT95-8-7 Backcan for blind-mount installations

- Compatible Grilles:
 - 170-8A
 - G22-8
 - M222W
 - P900
 - VP60R

FA95-8, FA-95-8FR, FA95-8NK, FA97-8, FA 97-8FR, and FA97-8NK Backcans

- Compatible Grilles:
 - FA51-8
 - FA170-8
 - FA720-8
 - FA730-8
