JBL CONTROL CONTRACTOR TAKES ON THE ELEMENTS IN BORA BORA

BORA BORA – NOVEMBER 6, 2002 – The new Sheraton Hotel on the French Polynesian island of Bora Bora has just completed the installation of 60 JBL Control® Contractor Series speakers. The picturesque, five-star resort features a total of 120 rooms, 70 of which are private, over-water bungalows.

The hotel needed a sound system for ambient music throughout the entire resort, including the reception area, hotel restaurant, the beachside restaurant grill and a banquet room. The technical team of Total Video Distribution, the JBL distributor in French Polynesia, collaborated with an architect to design the system. A total of 50 Control 25T surface-mount speakers and 10 Control 26CT ceiling speakers were installed on the property. The entire system is controlled from the reception desk, which features a 400-disc CD player and a CT210 Crown Amplifier. In addition to this main control station, each separate room has its own music system with a five-disc CD player and Crown CT210. This allows each room to switch from the general system to its own choice of music.

Control Contractor speakers installed in the outdoor grill

The Control Contractor speakers with silver stainless-steel grilles are an ideal choice for the venue. The stainless-steel grilles, along with other available accessories, allow the speakers to endure in minimally protected areas, withstanding high tropical humidity levels and salty-air environment.

Control Contractor withstands the tropical humidity levels and salty air at the Sheraton Hotel.

Headquartered in Northridge, California, JBL Professional is the world's leading designer, manufacturer, and marketer of professional loudspeakers for recording and broadcast, musician, cinema, touring sound, commercial sound and contracting applications. JBL Professional is part of the Harman International network of professional and consumer audio companies. For complete product and company information, go to the JBL Pro website at www.jblpro.com.
