JBL PROFESSIONAL EVO INSTALLED IN LEOPOLD MUSEUM IN VIENNA

NORTHRIDGE, CA – OCTOBER 14, 2002 – JBL Professional's EVO speakers were chosen for installation into Vienna's new Leopold Museum. Leopold Museum features sophisticated architecture with classical, elegant solutions. JBL's EVO speaker system has been installed in a multipurpose room inside the museum. This 117-seat room is used for a variety of functions including concerts, podium discussions, movies, and presentations.

One of the new museums in Vienna's art district, the five-story Leopold Museum houses the art exhibition of Rudolf Leopold. The collection of more than 5,000 paintings includes works by artists such as Egon Schiele, Gustav Klimt, and Oskar Kokoschka.

The installation was completed by audio specialists, Georg Vanek and Franz Bocksteiner/Ton&Technik, who chose EVO because of its functionality and ease of use. The high standards set by the museum required an audio system that would perform perfectly; it was determined that EVO was the speaker system suitable for the task. Another factor in the decision to choose EVO was its compact and elegant design and ability to be mounted horizontally, allowing for speaker placement below the ceiling line.

Vanek, pleased with the installation, stated, “It sounds very good; plays very good; everything fits.” Bocksteiner agreed saying, “Achieving an acoustical solution of the highest standards, such as in this venue, is only possible in liaison with clients and brand names we trust. Over the course of my career, JBL has proven that they don’t compromise any quality.”

The EVO installation in Leopold Museum’s multipurpose room turned out so well that the installers were asked to install other systems. The museum’s coffee shop, Café Leopold, now features several other JBL products including the Marquis Series MS28, Control 1, and EON G2 speakers.

EVO is a complete, ready to use sound system with automatic digital control over room equalization, feedback suppression, delay settings and amplifier dynamics. An ideal audio system for churches, schools, performing arts centers, civic meeting sites and other small to medium size installations, the EVO System can be installed and tuned in a matter of hours. The complete EVOi.SYS Sound system includes intelligent powered speakers, mixer, wireless and wired microphones, system controller, and all necessary cables and stands.

Headquartered in Northridge, California, JBL Professional is the world’s leading designer, manufacturer, and marketer of professional loudspeakers for recording and broadcast, musician, cinema, touring sound, commercial sound and contracting applications. JBL Professional is part of the Harman International network of professional and consumer audio companies. For complete product and company information, go to the JBL Pro website at www.jblpro.com.
