## Exceptional Sound, LLC Revs Up National Corvette Museum With JBL Loudspeakers

NORTHRIDGE, California – JBL's performance speaks for itself, which is why the Facilities Director of the National Corvette Museum in Bowling Green, Kentucky selected JBL loudspeakers for an upgrade to the Museum's Chevrolet Theater after hearing them at his community church. Exceptional Sound LLC designed and installed the new system, providing the Chevrolet Theater with a 5.1 surround sound system complete with nine JBL loudspeakers.

Exceptional Sound, LLC has been using JBL loudspeakers for years and is familiar with the sonic integrity for which JBL is known. The company's past experience led it to select a series of two AM6200/64 and one AL6115 loudspeaker, with four AM6215's for front LR and rear LR and two ASB6128 subwoofers under the stage. The 5-day installation provided the Chevrolet Theater with a flawless surround sound system.

"The JBL speakers proved to be the perfect solutions for this project," said Laran Philpott, Owner of Exceptional Sound, LLC. "Each speaker allowed us to place them either vertically or horizontally depending on the space requirement which made them really easy to fit; and the quality of sound that comes with each speaker just can't be beat."

The Museum was so pleased that it called Exceptional Sound back for another system in its new conference center. Philpott and his team again turned to JBL for the installation, ultimately choosing two AM4215 main speakers, two MRX512M monitors, 10 Control 25 AV surface mount loudspeakers for delay and an ASB6118 subwoofer for full, even sound throughout the space.

**Exceptional Sound, LLC recently outfitted the Chevrolet Theater at the National Corvette Museum with a 5.1 surround sound system that features JBL loudspeakers.**

"We have been using JBL for years and we absolutely love all of their products," Philpott said. "We use JBL for every church and theater installation that needs high-quality sound at affordable prices."
