SOUTH AFRICA ENJOYS JBL VERTEC® LINE ARRAY SYSTEM AT COCA-COLA COLAB LIVE ON TOUR CONCERTS

NORTHRIDGE, CALIFORNIA, January 5, 2007 — Demonstrating the versatility and reliability of JBL VERTEC® line arrays, Shattered Glass Group's A.V. & Staging division recently provided a portable VERTEC system for the Coca-Cola Colab Live on Tour Concerts in South Africa. A major multimedia entertainment production designed to carry Coca-Cola's corporate message to music-loving audiences throughout the nation, the Concerts were presented in coordination with regional promoters and radio stations. The six-hour show featured a mix of up and coming South African talent and leading local artists.

A total of 24 VERTEC VT4888 mid-size full-range line array elements were combined with 16 full-size VT4880 subwoofers to create a sound system to meet the presentation and staging needs for the tour project. Stages were set up in public spaces and sports stadiums in major South African cities at venues such as ABSA Stadium in Durban, ABSA Stadium in East London, Stan Abbot Park in Cape Town and The Royal Show Grounds in Pietermaritzburg.

The JBL VERTEC system was powered by Crown I-Tech amplifiers, and Shattered Glass deployed their new dbx 4800 DriveRack loudspeaker management system for the events. Soundcraft MH3-40 consoles were used for front-of-house and monitor systems, while JBL SR712M monitors provided onstage support. "We had crowds ranging from 8,000 to 16,000 at every show on the tour, and the sound system performed flawlessly every time," advised Alex Sanfilippo, technical director for the Shattered Glass Group. "The JBL VERTEC system has always sounded good, but when driven with the new dbx 4800 DriveRack, the sound has an even smoother quality to it."

Providing audiovisual and staging services in South Africa for the past decade, Shattered Glass AV & Staging is a full-service integrated production design and rental services company. "We select our audio gear from world market brand leaders and like to invest in equipment that consistently appears on technical riders for major artists," noted Sanfilippo. "Reliability and technical excellence are key words in our choice of sound system equipment, and we like to think these

should also be our clients' key words when choosing their audiovisual supplier."

David Scheirman, vice president, tour sound for JBL Professional, notes the recent, measured growth of Shattered Glass with interest. "Integrated audiovisual production companies are faced with unique challenges," explained Scheirman. "Having to establish and support staging, video, lighting and audio departments simultaneously can represent a formidable task for a new company. With projects like Coca-Cola Colab Live on Tour, Shattered Glass is proving its ability to offer quality gear and services for South Africa's leading event promoters and production planners."
