JBL Professional Introduces 8100 Series In-Ceiling Loudspeakers

The 8100 Series features 4-inch and 8-inch models, providing cost-effective solutions for commercial applications.

LAS VEGAS, Nevada – Offering cost-effective solutions combined with ease of installation and elegant styling, JBL Professional is introducing the new 8100 Series ceiling speakers at InfoComm 08. The 8100 Series are full-range in-ceiling loudspeakers with high sensitivity, low distortion, and smooth frequency response.

The 8100 Series lineup includes two models: the 8124, a 4-inch loudspeaker with extremely wide coverage; and the 8128, an 8-inch loudspeaker that offers extended bass response and higher SPL output. Both speakers feature high sensitivity for maximum system efficiency and excellent full-range response, making them ideal for small to medium background music systems. Low-saturation transformers with taps as low as 0.75 Watts allow the use of many speakers on 70V/100V distributed loudspeaker system lines. The 8100 Series are “open-back” ceiling speakers with pre-attached dog-ears, offering an affordable solution for commercial applications that do not require backcans. An elegant design featuring a sculpted grille provides a stylish look that fits into a wide variety of decors.

The new JBL Professional 8100 Series in-ceiling loudspeakers offer high sensitivity, low distortion and smooth frequency response.

“The JBL 8100 Series in-ceiling loudspeakers provide an optimal combination of affordability and quality,” said Rick Kamlet, Senior Market Director, Commercial Sound, JBL Professional. “Their ease of installation and wide coverage makes them a great fit for cost-effective installations in a variety of environments.”

JBL Professional is a unit of Harman International Industries, Incorporated (www.harman.com). Harman International designs, manufactures and markets a wide range of audio and infotainment products for the automotive, consumer and professional markets, and maintains a strong presence in the Americas, Europe and Asia, employing more than 11,000 people worldwide.
